SEATING

"The most comfortable stadium seat I have sat on..."

Keith Edelman Managing Director Arsenal FC

**THEBOXSEAT®**

1100 model

**VIP/Club Seating**

Soft cushioned indoor and outdoor seat. The 1100 exceeds expectations of comfort and style combined in a superior VIP and Club Seat.

908 model

**Members/Corporate Seating**

Soft cushioned indoor and outdoor seat. The 908 has been described as the most comfortable stadium seat available.

907 model

**Members/General Admission Seating**

Durable ergonomic all weather seat. The 907 is a premier spectator seat.

903 model

**General Admission Seating**

The 903 is a robust economical seat with all the benefits of the unique TBS compact fold.

Media-Link

**Media Seating**

The Media-Link is a purpose designed media & press communication seat with data and power solutions.

The Box Seat is a purpose built stadium seating system.

From the budget conscious 903 model to the VIP 1100 model the seats are all based on the same rail system.

The Box Seat system has been specifically designed to be used throughout a venue so that venue managers are not contending with 3 or 4 different seating systems to accommodate customer markets.

The Box Seat allows a venue to be fitted with the one seating system that is totally flexible, minimises installation and maintenance costs, and allows seat interchangeability at any time.

**Use one system for your entire stadium.**

The BOX Seat 1100 model is a fully cushioned durable top of the range Club seat which uses the same unique rail system as all of The BOX Seat models.

The 1100 model combines high performance impact and stain-resistant external shell laminate with a luxurious cushion padding to create a seating system for VIPs.

Optional timber outer shell and soft leather upholstery are available.

1100model

The BOX Seat 908 model incorporates a soft seat and backrest insert.

The insert pads uniquely maintain the correct ergonomic profile, providing superior stadium seat comfort.

This is not an add on cushion pad which destroys a seat's lumbar and comfort, this is a 'world first' in stadium seating cushioning systems suitable for indoor and outdoor stadium environments.

By integrating the cushion into the seat and backrest cavity The BOX Seat 908 model provides the only correct ergonomic comfort in durable stadium seating.

The BOX Seat 908 model has gained the reputation of being "the most comfortable stadium seat" in the market.

908model

The BOX Seat 907 model is a full polymer seat, designed to handle extreme stadium arena environments, whilst offering all of the ergonomic comfort of the padded 908 model.

907model

The BOX Seat 903 model is the economical choice, incorporating a tough polymer seat with exceptional durability.

The BOX Seat 903 model is slim and compact, making it the perfect solution for high volume seating areas.

The compact folding dimension also increases the ease of spectator access and egress.

Add an armrest or tablet table for a functional amenities chair.

The Box Seat 903 model is the result of meticulous attention to detail and innovative design.

903model

The 'Media-Link' armrest is the first purpose built Media & Press seating armrest system for Stadia.

The patented 'Media Link' is unique in providing an ergonomic multi-positional desktop with optional data & power sockets for journalists to get their material back to base fast.

The 'Media-Link' armrest boasts the tightest fold away tablet table and the largest desktop surface for ease of laptop operation or writing tasks.

When the seats are not required for Press disconnect the Media-Link and use the seats for spectators.

For good *press* connect the 'Media-Link'.

## optional accessories

### Row Number

Customised row end numbers with high impact acrylic lens to protect the decal.

### Seat Number

High impact acrylic lens covered seat numbers secure the decal from removal.

### Armrests

Armrests provide personal space and support when standing.

### Cup holder

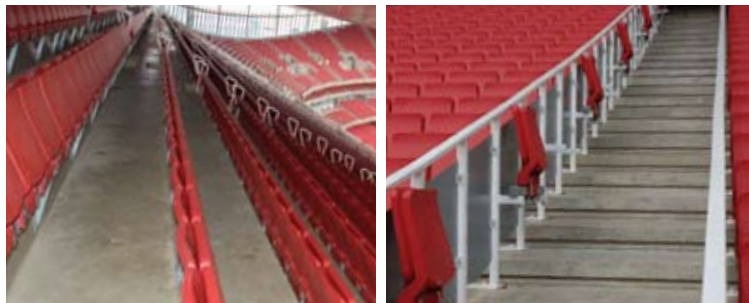

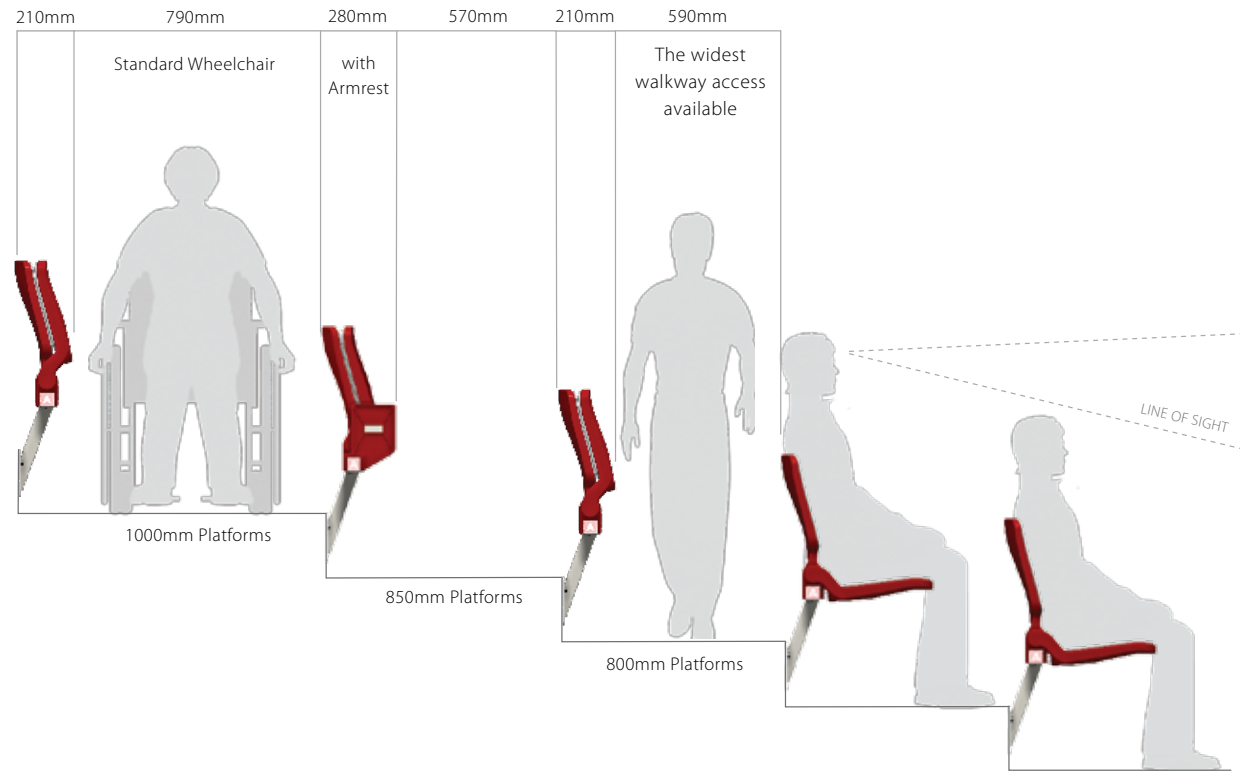

Convenient cup holders for all requirements. This special cup holder is designed for tight seat spacing.

### Tables

VIP seating tables customised to suit individual requirements.

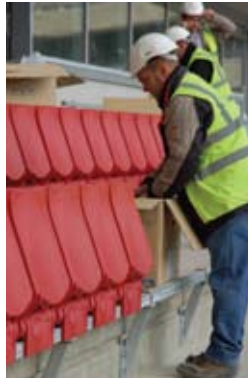

### Specialised & Custom Accessories

The Product People provide comprehensive design solutions for specialised optional accessories. Contact our design team to discuss your specific requirements.

The BOX Seat incorporates a patented soft action rotation system which enables the seat to tip up tight, allowing the widest possible walkway access.

The seat's compact design and wider access gained allows maximum seating capacity whilst benefiting efficient emergency spectator egress.

Set to transform the face of stadium seating installation The BOX Seat's unique rail system has been specifically designed for rapid installation.

This simple rail construction allows the installation team to maneuver over drainage holes, across expansion joints and even spans up to 2 seats over steps or gaps in the concrete. No other system is as versatile or accommodating as The BOX Seat's rail system.

### Colours

The BOX Seat range is available in various colours and shades to suite specific requirements and designs.

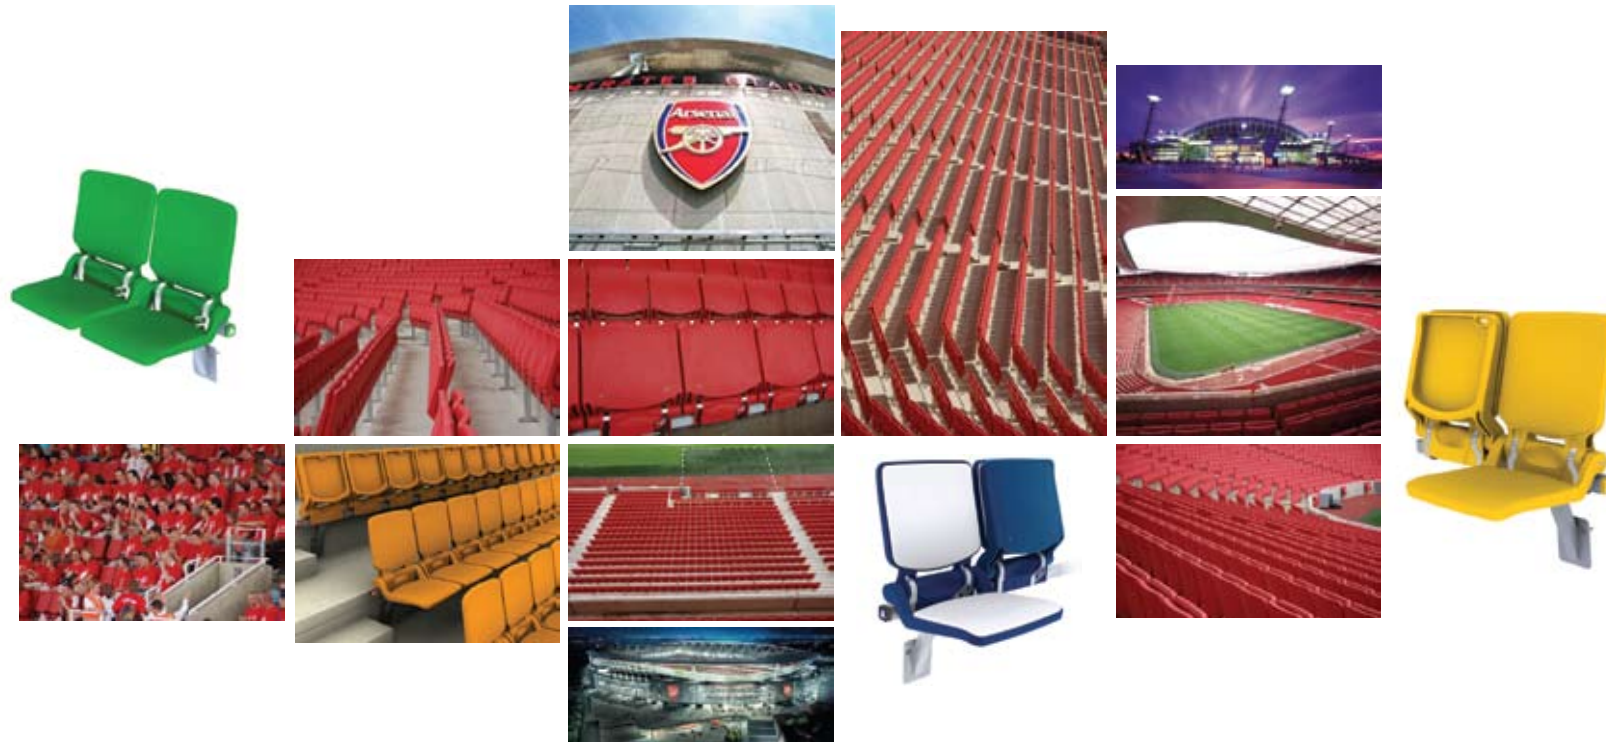

### Fabrics

To assist colour co-ordination a recommended range of commercial seating fabrics, leathers and vinyls are available on request.

The right fabric choice can transform a space, discuss your requirements with our colour and fabric specialists.
